Entomofauna of Old World (EOW) was first announced by Koçak and Kemal on 23 October, 2008.<sup>1</sup> Since then, the contribution to the Project was unfortunately realized by these two authors only. The present list is composed of the collated records from the publications from the Cesa library, numerous new provincial and state records based upon the Cesa collection, and 185 originally prepared distributional maps. The presentation format of the list is as follows:

Valid name together with the author and the date of publication are given first, together with the indication of the family name. Synonyms are mentioned chronologically. Range of the species are indicated with codes. The same codes are also used for preparing the maps. Totally 2641 selected publications are arranged as author index.

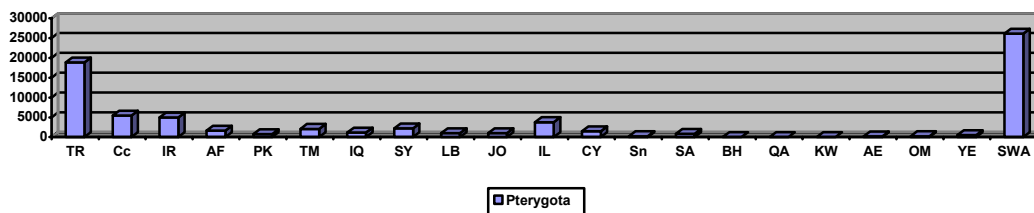

<sup>1</sup> Cesa News 31: 8.

Entomofauna of Turkey (ET) has been investigated by the authors since 2008.<sup>2</sup> The present numbers of the Lepidoptera, and the rest of the pterygot orders in the country raised to 5406, and 18846, respectively (see the graph on the left). Thence, the current number of the species is 24252 for Turkey (TR).

In the info-system of the Cesa, the entomofaunistic information of secondarily interested neighbour countries are still lower than the expected level. For example, the top five countries (or region) are represented by the following species numbers: The Caucasus (Cc) [incl. Armenia, Georgia, Azerbaidjan, and Russia [in part]] is represented by 8590 pterygots for the time being.

Similarly, Iran (IR) by 8900 species, Israel (IL) by 5263 species, Afghanistan (AF) by 3551 species, Turkmenistan (TM) by 3307 species, etc.<sup>3</sup> (see graph). The present number of the species of the Pterygota orders of South-West Asia (SWA) is 37235. Among them, 26111 species (excl. Lepidoptera) are given in the present paper.

This is the first temporary report of the Entomofauna of South West Asia [SWA]. Separately 185 distributional maps are prepared specially.

The families evaluated here are given below alphabetically: Acanthosomidae, Achilidae, Acrididae, Acroceridae, Aeshnidae, Agaonidae, Agromyzidae, Aleyrodidae, Alydidae, Amorphoscelidae, Andrenidae, Anthicidae, Anthocoridae, Anthomyiidae, Anthribidae, Aphalaridae, Aphelinidae, Aphelocheiridae, Aphididae, Apidae, Apionidae, Aradidae, Argidae, Ascalaphidae, Asilidae, Asterolecaniidae, Athericidae, Attelabidae, Aulacidae, Baetidae, Belostomatidae, Beraeidae, Berothidae, Berytidae, Bethylidae, Bibionidae, Bittacidae, Blaberidae, Blattidae, Blephariceridae, Bombyliidae, Bostrichidae, Brachycentridae, Brachyceridae, Braconidae, Braulidae, Brentidae, Bruchidae, Buprestidae, Byturidae, Caenidae, Calamoceratidae, Caliscelidae, Calliphoridae, Calophyidae, Calopterygidae, Camillidae, Cantharidae, Capniidae, Carabidae, Carnidae, Cebrionidae, Cecidomyiidae, Cephidae, Cerambycidae, Ceratopogonidae, Cercopidae, Cerococcidae, Chalcididae, Chamaemyiidae, Chaoboridae, Chironomidae, Chloroperlidae, Chloropidae, Chrysidae, Chrysomelidae, Chrysopidae, Cicadellidae, Cicadidae, Cimicidae, Cixiidae, Cleridae, Coccidae, Coccinellidae, Coenagrionidae, Colletidae, Coniopterygidae, Cordulegasteridae, Corduliidae, Coreidae, Corixidae, Corydiidae, Crabronidae, Culicidae, Curculionidae, Cydnidae, Cylindrotomidae, Cynipidae, Dactylopiidae, Delphacidae, Derbidae, Dericorythidae, Dermestidae, Diapheromeridae, Diaspididae, Diastatidae,

Since an inventory study on the Entomofauna of South West Asia was a scientific requirement, we started this enormous work with our own decision. Nobody forced us, or supported financially on this issue.
